### **DETAILED ACTION**

This Office action is in regards to Application No. 10,056,041 and is in response to communications: application filed 2/1/2002, amendment filed 1/23/2006. Claims 1-3, 17, and 19-20 are amended. Claims 1-20 are now pending.

The Examiner requests, in response to this Office action, a showing support for the following: claim language found in the present independent claims 1, 7, 9, 17, 19-20. Claim language added to any present claims on amendment and any new claims. That is, indicate support for claim language by specifically pointing to page(s) and line no(s) in the specification and/or drawing figure(s). This will assist in prosecuting the application.

When responding to the Office action, Applicant is advised to clearly point out the patentable novelty the claims present in view of the state of the art disclosed by the reference(s) cited or the objection made. A showing of how the amendments avoid such references or objections must also be present. See 37 C.F.R. 1.111(c).

### ***Response to Arguments***

The §112 rejection is withdrawn due to Applicant amendments.

Applicant's arguments with respect to §101, have been fully considered but they are not persuasive. Applicant argues the PTO Board of Appeals ruling *In re Lundgren* as well as the USPTO Interim Guidelines on Patentable Subject Matter. The Examiner's rejection relied on *Schrader* and *State Street* and neither alleges nor implies any of the tests listed in the Patentable Subject Matter Guidelines or *Lundgren*.

Applicant's arguments with respect to the §102 rejection have been fully considered and are persuasive. The rejection of claims 1-20 has been withdrawn.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed invention manipulate only numbers, abstract concepts or ideas, or signals representing any of the foregoing, the acts are not being applied to appropriate subject matter. *Schrader*, 22 F.3d at 294-95, 30 USPQ2d at 1458-59. Thus, a process consisting solely of mathematical operations, i.e., converting one set of numbers into another set of numbers, does not manipulate appropriate subject matter and thus cannot constitute a statutory process.

Also, the claimed invention as a whole must accomplish a practical application. That is, it must produce a "useful, concrete and tangible result." *State Street*, 149 F.3d at 1373, 47 USPQ2d at 1601-02. Further, patent eligibility standard requires significant functionality to be present to satisfy the useful result aspect of the practical application requirement. See *Arrhythmia*, 958 F.2d at 1057, 22 USPQ2d at 1036.

Claims 1-20 appear to be allowable over the prior art of record.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
